🪪 Summary

Recent Computer Science graduate with a strong eagerness to learn and grow within a dynamic company. Committed to becoming a valuable asset by exploring various opportunities in the tech industry and gaining knowledge from experienced mentors.

📁 Projects

Movie Mania ⎘
Developed an interactive movie battle platform using React, Styled Components, Node.js, Express, and MySQL. Features include random and custom battle voting, battle creation, detailed statistics with vote counts and winning movies, and a comment section for user engagement.

Task-Board ⎘
Created a task management application using React, focusing on innovative task tracking. Users can add tasks with descriptions and relevance, toggle task completion, and delete tasks .The user interface incorporates dynamic icon and color changes for an enhanced user experience.

🧠 Skills

- Programming Languages: HTML, CSS, JavaScript

- Frameworks and Libraries: React.js, Tailwind CSS,Node.js, Express

- Databases: MySQL

- Tools and Technologies: GitHub, Vercel, Visual Studio Code

🎓 Education

B.Tech in Computer Science, Universal College of Engineering   2020 – 2024
