Summary

Computer Science graduate passionate about front-end development, eager to explore and adapt to new technologies. Proficient in React.js, Tailwind CSS, and full-stack development, with hands-on experience building dynamic web applications. A quick learner with a growth mindset, excited to collaborate in innovative environments and continuously expand my skill set.

Projects

Portfolio

<https://portfolio-phi-liard-12.vercel.app/>

A personal portfolio website showcasing my skills, projects, and experience in web development. Designed with a clean UI using React.js and Tailwind CSS, it serves as a central hub to connect with me and explore my work.

Task-Board

<https://task-board-sand.vercel.app/>

Created a task management application using React, focusing on innovative task tracking. Users can add tasks with descriptions and relevance, toggle task completion, and delete tasks. The user interface incorporates dynamic icon and color changes for an enhanced user experience.

Skills

- Programming Languages: HTML, CSS, JavaScript
- Frameworks and Libraries: React.js, Tailwind CSS, Node.js, Express
